INSTALLATION | DECK FOOT ANCHOR™

SLOPED GRADES

DO NOT ATTACH TO HOUSE

***Designed for non-ledger attached decks.**

*EXCEPTION ALLOWED WHERE GROUND DOES NOT FREEZE.
NOT RECOMMENDED FOR SECOND STOREY WALKOUT DECKS.
NOT INTENDED FOR FENCES OR OTHER STRUCTURES
REQUIRING LATERAL LOAD RESISTANCE.

Introducing Terra-Shift™

“A SHOCK ABSORBER SYSTEM FOR YOUR DECK”

The Titan Deck Foot Anchor™ uses our patented Terra-Shift™ post bracket system to help keep soil around the anchor undisturbed and prevent damage to all post and beam and other structural connections.

TERRA-SHIFT™
Technology

Here is how it works:

The fastener slide holes reduce friction between the

post and bracket just enough so that if the soil shifts or expands unevenly along a series of footings under a beam, the post is free to slide vertically and then settle back to normal. It's like a shock absorbing system for your deck.

1/4" x 2 1/2" lag screws
or #14 x 2 1/2" screws.

Locate screws at
bottom of holes.
